

PROJECT 3:

VIDEO SEQUENCE

Izabella J Adams Art 10C Digital Media Spring 2026

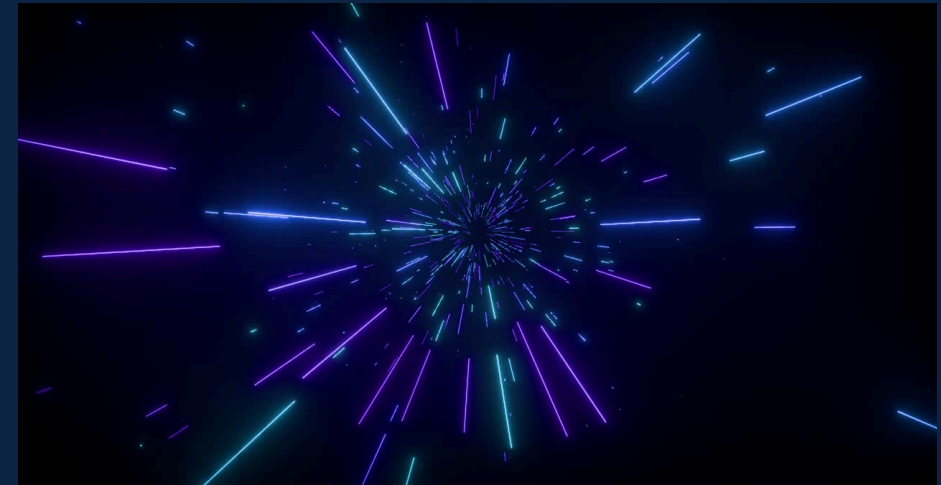

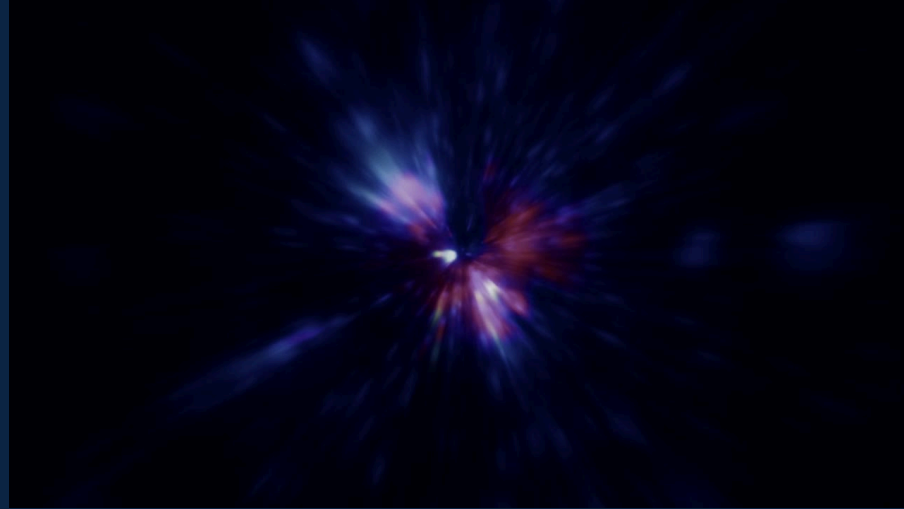

PROPOSAL

I've created a video sequence that explores the beauty and mystery of the universe through a journey across space through transitions and masking. Additionally, I've used a variety of galaxies, nebulae, stars, and effects, which creates a sense of wonder while also emphasizing movement, depth, and atmosphere.

Overall, the project demonstrates principles of visual storytelling, composition, pacing, and motion design while creating a visually engaging experience of space.

REFERENCE PHOTOS/VIDEOS

Multiple videos and imagery of space and effects.
